

Encryptus API Documentation — Work Plan

API surface (from `encryptus_swagger.json`): 163 endpoints across 12 categories

Category	Endpoints
Partners	57
Tickets	23
Bank Wire	21
Fiat Wallets	17
Topup	13
Gift Card	10
Billpayment	7
Webhook	5
Liquidity	5
Wallets	2
TRM	1
Untagged	2

Start: Thursday, 18 June (afternoon)

Day 1 — Thu 18 Jun (half day, afternoon)

- Note: Day 1 is half a day (afternoon only)
- Read Encryptus official docs:
<https://encryptus.gitbook.io/encryptus-sandbox/quickremit/getting-started>
- Walk through QuickRemit getting-started, authentication, onboarding
- Note the main product areas and how they connect

Day 2 — Fri 19 Jun

- Go through the Swagger docs and explore all 163 endpoints to understand how each works and its purpose

Day 3 — Mon 22 Jun

- Go through the GitHub repo provided by Jordan that tests the APIs and understand the flow
- Go through the full report that was written and submitted by Jordan
- List which categories map to which docs sections

Day 4 — Tue 23 Jun

- Web design breakdown
- Layout structure
- Header
- Footer
- Navbar
- Mobile responsiveness
- Theme

Day 5 — Wed 24 Jun

- Write a non-technical documentation that is easy to understand for a normal user, explaining what each functionality does and its purpose in plain language (no code)
 - Partners category - 57 API endpoints

Day 6 — Thu 25 Jun

- Write a Non-technical documentation (no code) for the following categories
 - Tickets category - 23 API endpoints
 - Bank Wire category - 21 API endpoints
 - Fiat Wallets category - 17 API endpoints

Day 7 — Fri 26 Jun

- Write non-technical documentation (no code) for the following:
 - Topup category - 13 API endpoints
 - Gift Card category - 10 API endpoints
 - Billpayment category - 7 API endpoints
 - Webhook category - 5 API endpoints
 - Liquidity category - 5 API endpoints
 - Wallets category - 2 API endpoints
 - TRM category - 1 API endpoint

Day 8 — Mon 29 Jun (Writing the API reference)

- Categories covered:
 - Partners - 57 API endpoints
- Document each request and its payload items for all the endpoints
- Document the responses and their items for all the endpoints

- Document the different error responses for all the endpoints
- Add a way for users to test with live requests for all the endpoints
- Add real code examples written in TypeScript for all the endpoints

Day 9 — Tue 30 Jun (Writing the API reference)

- Categories covered:
 - Tickets - 23 API endpoints
 - Bank Wire - 21 API endpoints
- Document each request and its payload items for all the endpoints
- Document the responses and their items for all the endpoints
- Document the different error responses for all the endpoints
- Add a way for users to test with live requests for all the endpoints
- Add real code examples written in TypeScript for all the endpoints

Day 10 — Wed 1 Jul (Writing the API reference)

- Categories covered:
 - Fiat Wallets - 17 API endpoints
 - Topup - 13 API endpoints
 - Gift Card - 10 API endpoints
 - Billpayment - 7 API endpoints
 - Webhook - 5 API endpoints
 - Liquidity - 5 API endpoints
 - Wallets - 2 API endpoints
 - TRM - 1 API endpoint
- Document each request and its payload items for all the endpoints
- Document the responses and their items for all the endpoints
- Document the different error responses for all the endpoints
- Add a way for users to test with live requests for all the endpoints
- Add real code examples written in TypeScript for all the endpoints

Day 11 — Thu 2 Jul

- Review by the team
